

Case Info

This tab displays basic information about the claim: Case ID, Case Status, Name, Carrier information, Claimant information, accident information, etc.

- 1 **Case ID** or number that is assigned by the Board when the case is assembled and **Claimant Name**.
- 2 **Case Status** Description of where case is in the resolution process. [Click to see possible values for this field.](#)
- 3 Carrier information—W# is assigned to carriers by the Board for identification.
- 4 Claimant information
- 5 Accident, injury, and death (if applicable) information. **ANCR** (Accident, Notice, and Causal Relationship) **Date** is the date the Board established or accepted the claim. It must be determined that a work-related **accident** covered by WCL occurred; that after the accident, the claimant **notified** (notice) his/her employer within the time limit required by WCL; and that a **causal relationship** exists between the accident and the resulting injury or disability.
- 6 Hearing information, if applicable.
- 7 Other claims the claimant may have —one case is designated the “lead” case.
- 8 Sometimes cases are created in error and the Board has two claims assembled for the same incident. When the error is discovered, one case is “cancelled into” or combined with the other case and then cancelled so the result is a single case.
