FOREWORD

The revised tables printed in this bulletin apply only to compensation cases where the death or accident occurred on or after January 1, 1978. Earlier tables in the 1948 Special Bulletin No. 222 apply to cases where the death or accident occurred prior to January 1, 1978. (See also Special Bulletins No. 207 and 190.)

Chapter 675, Laws of 1977, effective January 1, 1978 made certain increases in benefits as a percentage of wages, and necessitated the revision of the earlier tables. Chapter 675 makes no changes in the mortality or remarriage tables specified for all official computations. The tables in this revised bulletin continue to be based on the Survivorship Annuitants' Table of Mortality, the remarriage tables of the Dutch Royal Insurance Institution, and interest at the rate of 3% per annum.

These tables were approved by an actuarial advisory committee which included Messrs. C. Metzner of the Aetna Casualty & Surety Company, J. Schulman of the State Insurance Fund, R. Young of the Utica Mutual Insurance Company, C. Gruber and D. Gogol of the New York Compensation Insurance Rating Board. I take this opportunity to express my appreciation to the actuaries and the committee whose assistance facilitated early publication of these tables.

Chairman
Workers' Compensation Board

DEC'D

March 31, 1978

Tables I, IA, IB, IC, ID, IV, V, VI, VII, VIII, IX and XV were calculated by a computer program developed by the Actuarial Division of the State Insurance Fund. Those planning to computerize the calculations of these tables may contact the Fund or the actuarial advisory committee to ensure that the same procedures on rounding, etc. are followed in order that identical values are produced by their own programs.

EXPLANATION AND EXAMPLES

The set of tables is necessitated by the recent amendment to the New York State Workers' Compensation Law which became effective January 1, 1978 and reflects certain increases in benefits as a percentage of wages.

The recent amendment to the law makes no changes in the mortality or remarriage tables specified for all official computations. These tables, therefore, continue to be based on the Survivorship Annuitants' Table of Mortality, the remarriage tables of the Dutch Royal Insurance Institution, and interest at the rate of 3% per annum.

These revised tables apply only to compensation cases where the death or accident occurred on or after January 1, 1978. Similar Workers' Compensation tables are in the 1948 Special Bulletin No. 222, published by the Workers' Compensation Board. These apply up to January 1, 1978.

The following nine examples have been worked out to illustrate the use of the tables contained in the Bulletin. Examples 1, 2, 3, 4, 6 and 7 are similar to Examples 1, 2, 3, 4, 6 and 7 of the 1948 Special Bulletin No. 222 except for slight changes to bring the basic facts up to date. Examples 5 and 8 are almost identical to Examples 5 and 8 of the 1948 Special Bulletin No. 222. Example 9 is new and describes the calculation of any applicable Social Security offset.

These examples, although they do not illustrate the use of each revised table, should be sufficiently illustrative of the principles involved to facilitate the use of these tables for other and more involved problems.

Since it would be a prohibitive task to prepare tables covering all possible combinations of dependents in fatal cases, these published tables are not intended to serve for the relatively infrequent cases where there is a combination of dependents involving dependents other than a widow and children. These and other cases not covered by the tables will require extended individual treatment.

WORKERS' COMPENSATION EXAMPLES

Example No. 1

Death Case

Award to Widow or Widower and One Child

To find the value as of 1-28-79 of an award to a widow or widower and one child with birth dates as given below where the injured employee had received annual wages of \$18,275, was killed 9-1-78, and compensation benefits had been paid regularly to the dependents to 1-28-79.

Dependents			
Date of Birth	Nearest Age	Nearest Age	Nearest Age
5-22-39	1-5-68	11	12
9-1-78	9-1-79	39	40

From Table	Value as of 9-1-78	Value as of 9-1-79	Increase 1 Year
I	\$1,135.91	\$1,142.38	
	174.45	154.57	
	\$961.46	\$987.81	
	191.64	166.49	
I-A			
IV			
Total Tabular Value to Widow and 1 Child			
*Plus: Increase to 1-28-79			
Tabular Value 1-28-79			
Multiply by Number of \$100			
Annual Wages**			
Present Value of Future Payments as of 1-28-79***			
	\$1,153.59	140.40	\$161,964.04

* Increase to 1-28-79:

From 9-1-78 to 1-28-79 is 149 days.

Since the increase from 9-1-78 to 9-1-79 is \$1.20, the increase for $\frac{149}{365}$ of a year is \$0.49.

** Reduced to \$140.40 since maximum wage base from 7-1-78 to 12-31-78 is \$270 per week.

*** Subject to Social Security offset if applicable.

Example No. 2**Death Case****Award to Widow or Widower and Six Children**

To find the present value as of the date of death of the injured employee of an award to a widow and six children with birth dates as given below where the employee was killed 12-15-79 and received annual wages in excess of the maximum compensable wage (\$16,770 or higher for 1979).

Dependents	Date of Birth	Nearest Age 12-15-79
Widow	3-6-47	33
Youngest Child	8-14-77	2
2nd Youngest Child	5-20-75	5
3rd Youngest Child	11-2-73	6
4th Youngest Child	9-16-72	7
5th Youngest Child	1-8-70	10
6th Youngest Child	7-30-67	12

	From Table	Value	Value
Widow's Portion of Benefit as of 12-15-79:			
Widow without children	I		\$1,036.45
Less:			
Reduction a/c Youngest Child	I-A	\$287.15	
Reduction a/c 2nd Youngest Child . .	I-B	6.96	
Reduction a/c 3rd Youngest Child . .	I-C	0.23	
Reduction a/c 4th Youngest Child . .	I-D	0.01	
Reduction a/c 5th and 6th Youngest Children	(Values always zero)		
Total Reduction			294.35
Widow's Portion			\$742.10
Children's Portion of Benefits as of 12-15-79:			
Youngest Child	IV	\$388.78	
2nd Youngest Child	V	51.54	
3rd Youngest Child	VI	33.11	
4th Youngest Child	VII	2.85	
5th Youngest Child	VIII	.08	
6th Youngest Child	(Values always zero)	.00	
Total Children's Portion			\$476.36
Total Tabular Value to Widow and Four Children			\$1,218.46
Present Value of Death Benefits as of 12-15-79			
Total Tabular Value multiplied by number of \$100 of Compensable Annual Wages (1,218.46 X 167.7)*			\$204,335.74

*Subject to Social Security offset, if applicable.

*Example No. 3
Schedule Disability Case*

A married employee lost his arm 11-15-79 and was given an award of \$120 per week for 312 weeks from that date. Compensation was regularly paid to 4-17-80, on which date an advance lump sum award of \$6,000 was made. What is the effect of this award by the following plans?

- (a) Payments can be suspended for how many weeks?
 (b) Weekly compensation rate can be reduced to what amount?
 (c) Payments will terminate on what date if this amount is deducted from the end of the award?
 From Table XXIV it is found that 22 weeks have been paid to 4-17-80 so that on that date 290 weeks remain unpaid.

Plan (a) The present value for unknown number of weeks is \$6,000 at \$120 per week or \$50 at \$1 per week. From Table XII, 50,000 lies between the present value for 50 weeks and the present value for 51 weeks.

From Table XII, the present value for 51 weeks	50.2561
From Table XIII, the present value for 50 weeks	49.2845
Decrease for 1 week	0.9716
The present value for unknown number of weeks	50.0000
The present value for 50 weeks	49.2845
Difference	0.7155

$$0.7155 \div 0.9716 = 0.74$$

Payments should therefore be suspended for 50.74 weeks from 4-17-80.

Plan (b) From Table XIII, the present value of the remaining 290 weeks is $267.3554 \times \$120$ or \$32,082.65. Of this amount 6,000 or 0.1870 was granted by the lump sum award. 32,082.65 All future payments may therefore be reduced by 0.1870 $\times$ \$120 or by \$22.44 so that \$97.56 is the new weekly rate.

Plan (c) As in Plan (b) the present value of the 290 weeks remaining is found to be \$32,082.65. Of this amount \$6,000 is now paid so that the present value of the remainder is \$26,082.65 at \$120 per week or 217.3554 at \$1 per week. From Table XIII, 217.3554 lies between the present value for 232 weeks and the present value for 233 weeks.

From Table XIII, the present value for 233 weeks	218.2155
From Table XIII, the present value for 232 weeks	217.3392
Decrease for 1 week	0.8763
The present value for unknown number of weeks	217.3554
The present value for 232 weeks	217.3392
Difference	0.0162

$$0.0162 \div 0.8763 = 0.02$$

Payments will therefore terminate 232.02 weeks after 4-17-80 or on 9-27-84 with a final additional payment of \$2.40.

Example No. 4

Permanent Partial Non-Schedule Disability Case

To find the present value on 12-31-79 of a life award of \$108 per week made to an employee born 8-13-52 if payments had been made to 12-31-79.

From Table XI the tabular value at age 27 for each \$1 of annual compensation is 22.788. The annual compensation benefit is $52 \times \$108.00$ or \$5616.00. The present value of annual compensation benefits is therefore $\$5616.00 \times 22.788$ or \$127,977.41.

(Note. - This method is sufficiently accurate for reserve purposes. If an exact value is needed such as for purposes of a lump sum settlement, an interpolation must be made between anniversary dates of the accident. A similar interpolation for a fatal case is illustrated in Example No. 1.)

Example No. 5

Interest Due on Award Affirmed on Appeal

To calculate the amount of interest due on an award dated 4-22-40 for 40 percent loss of use of arm (124.8 weeks beginning with the date of injury, 7-7-39) at \$19.23 per week, if the award is confirmed by Court decision upon appeal. The insurance carrier makes an initial payment of compensation benefits in full due the injured employee for the period 7-7-39 to 11-1-40.

The total amount of interest due in the above case is determined by two separate calculations: (1) Calculation of the amount of interest for the period 4-22-40 (date of award) to 11-1-40 (date of payment) on the amount of compensation benefits which were due and unpaid for the period 7-7-39 (date of injury) to 4-22-40 (date of award); and (2) Calculation of the amount of interest on compensation benefits payable in periodic installments during the period 4-22-40 (date of award) to 11-1-40 (date of payment).

- (1) From 7-7-39 to 4-22-40 = $41 \frac{3}{7}$ wks. = 41.4286 wks.
Multiplied by weekly compensation rate = $\times \$19.23$

Product-Compensation Benefits due and unpaid

for period 7-7-39 to 4-22-40 = \$796.67

Interest on \$1 for 1 week at 6% per annum (.06 : 52) is .00115

The interest period 4-22-40 to 11-1-40 = $27 \frac{4}{7}$ wks. = 27.571 wks.

$\$796.67 \times .00115 \times 27.5714 = \25.26 Interest on Accrued Compensation for period 7-7-39 to 4-22-40.

- (2) From 4-22-40 to 11-1-40 = 27.5714 wks. during which period compensation benefits are payable in periodic installments. The interest period on each installment decreases progressively. The interest period on the first weekly installment of compensation for the week 4-22-40 to 4-29-40, assuming that the installment is payable at the end of the first week, is 26.5714 wks. (or 1 week less than the total period from date of award to date of payment). Similarly, the interest period on the second installment of compensation benefits is 25.5714 weeks (or 2 weeks less than the total period from date of award to date of payment). The total amount of interest due on periodic installments in any case may therefore be derived by using the formula:

Interest = (average interest period per payment) $\times$ (number of payments) $\times$.00115 $\times$ weekly Comp. rate.

In this case Interest = $\frac{26.5714 + .5714}{2} \times 27 \times .00115 \times \$19.23 = \$8.10$

Interest on Periodic Installments.

Total amount on interest due to 11-1-40 is $\$25.26 + \$8.10 = \underline{\underline{\$33.36}}$

Example No. 6
Death Case

Award to Orphan Children

To find the present value as of the date of death of the injured employee of an award to four orphan children with birth dates as given below where the employee was killed 12-15-79 and received annual wages of \$8,400.

Dependents		Date of Birth	Nearest Age	Value		Column in Table IX
Youngest Child	8-14-77	2	818.14	1	818.14	1
2nd Youngest Child	5-20-75	5	697.29	2	697.29	2
3rd Youngest Child	11-2-73	6	18.67	3	18.67	3
4th Youngest Child	9-16-72	7	0.58	4	0.58	4
Total Tabular Value			1,534.68			
Multiply by the Number of \$100 of			X \$84.00			
Annual Wages			\$128,913.12			
Present Value of Death Benefits as of 12-15-79						

The present value of awards to brothers, sisters and grandchildren may be determined by the use of Table IX-A. Since the use of this table is similar to that of Table IX, the method of computation shown in Example No. 6 may be followed.

Award to Brothers, Sisters and Grandchildren

Example No. 7
Death Case

Example No. 8
Death Case
Third Party Recovery

Award to Widow and No Children

In a fatal case where the deceased's earnings were \$1,950, and accident and death occurred 5-14-49 (after July 1, 1948), the carrier paid until 12-16-49 when there was a 3rd party recovery of \$4,095.00 by the widow who had no children. Find the value of the payment into the Aggregate Trust Fund as of 8-14-50.

Dependents	Nearest Age 5-14-50	Nearest Age 5-14-51
Widow.	44	45

	From Table	Value 5-14-50	Value 5-14-51	1 Yr. Decrease
Widow's Benefit	I	\$683.72	\$679.33	\$4.39
Less: Decrease to 8-14-50				
$\frac{92}{365} \times 4.39 =$		1.11		
Present Value 8-14-50 per \$100 Annual Wage		\$682.61		

The widow receives benefits at the rate of 40% of \$1,950 or \$780 per annum, therefore her \$4,095 recovery would suspend payments for 5.25 years or 273 weeks. Payments will then be resumed on March 11, 1955. The present value of this suspension is the present value for the payments suspended from 8-14-50 to 3-11-55, a total of 4.57260 years.

From Table XV for a widow aged 44 —

Present value of an annuity for 4 years = \$148.37
Present value of an annuity for 5 years = 180.74
By interpolation for 4.57260 years = 166.91

Summary

Present value per \$100 Annual Wage \$682.61
Credit for recovery - 166.91
Present value at 8-14-50 per \$100. \$515.70
Total tabular value multiplied by number of \$100 of
Annual Wages (515.70×19.50). \$10,056.15

Multiplier to cover expense of administering Aggregate
Trust Fund (currently 3% of present value) $\times 1.03$

Product equals amount of deposit into Aggregate Trust
Fund. \$10,357.83

Example No. 9
Social Security Offset Widow and One Child

(To compute the present value of a Social Security offset for a temporary period, use Table XV and multiply the result by the annual amount of the offset divided by \$66.67. For the present value of a Social Security offset until Death or Remarriage, use Table I and multiply the result by the annual amount of the offset divided by \$66.67. For a deferred offset, compute what the present value would be if the offset began immediately and then subtract what the present value of the offset would be for the period of deferment, using Table XV.)

In a fatal case in which the employee was killed 1-18-78, leaving a widow and one child with ages given below, the Social Security Offset has been computed to be \$1,600 per year until the child reaches 18. Find the reduction in the present value of the Compensation award due to the Social Security Offset.

Dependents		
Nearest Age	Date of Birth	Widow.....
		Child.....
28	9-7-49	
2	10-24-75	

Present value of temporary widow's benefit for period of 16 years (Table XV) = \$599.64

Social Security Offset (\$1,600) divided by \$66.67 (Widow's benefit per \$100 Annual Salary) = 24.00

Reduction in present value of compensation award due to Social Security offset = 24.00 X \$599.64 = \$14,391.36.

APPENDIX

Formulae for Workers' Compensation Tables

Definitions of Symbols

The present value $\bar{a}_x$ of a continuous life annuity was approximated by adding $\frac{1}{2}$ to the present value of a life annuity payable at the end of each year.

The present value $\bar{a}_{x:\overline{t}|}$ of a continuous temporary annuity payable for t years was approximated as $\frac{1}{2}a_{x:\overline{t}|} + \frac{1}{2}\bar{a}_{x:\overline{t}|}$.

The symbol $\bar{a}_x$ ' denotes the present value of a continuous annuity payable until death or remarriage. The symbol ${}_n\bar{a}_x$ ' denotes the present value of a continuous annuity payable until the death or remarriage of a person aged x , or the death of one of n specific other persons.

The symbol ${}_n\bar{E}_x$ ' : $\overline{t}|$ denotes the present value of a payment of \$1 made at the moment of remarriage, as long as t years have not elapsed and n specific other persons are all alive.

APPENDIX FORMULAE FOR WORKERS' SPECIAL

HEADING

TABLE NO.

I. Widow or Widower Where There are No Children*
Present value of Compensation per \$100 Annual Wage Base Payable
Until Death or Remarriage.
*Where there are children in addition to the widow or widower, the
above value for such widow or widower is reduced by the adjustments
found in the accompanying Tables I-A, I-B, I-C and I-D, depending
on the number of children (see Example No. 2 in the foregoing section
under Explanation and Examples.)

I-A. Reduction from Table I in Present Value of Widow's or Widower's Portion
of Compensation per \$100 Annual Wage Base Payable Until Death or Re-
marriage on Account of Youngest Child.

I-B. Reduction from Table I in Present Value of Widow's or Widower's Portion
of Compensation per \$100 Annual Wage Base Payable Until Death or Re-
marriage on Account of Second Youngest Child.
(This reduction is in addition to the reduction found in Table I-A for
youngest Child.)

I-C. Reduction from Table I in Present Value of Widow's or Widower's Portion
of Compensation per \$100 Annual Wage Base Payable until Death or Re-
marriage on Account of Third Youngest Child.
(This reduction is in addition to the reduction found in Tables I-A and
I-B for youngest child and second youngest child respectively.)

I-D. Reduction from Table I in Present Value of Widow's or Widower's Portion
of Compensation per \$100 Annual Wage Base Payable Until Death or Re-
marriage on Account of Fourth Youngest Child.
(This reduction is in addition to the reductions found in Tables I-A for
youngest child; I-B for second child; I-C for third youngest child.)

IV. Youngest Child.
Present Value per \$100 Annual Wage Base Payable Until Age 18.
V. Second Youngest Child.
Present Value per \$100 Annual Wage Base Payable until Age 18.

VI. Third Youngest Child.
Present Value per \$100 Annual Wage Base Payable Until Age 18.
VII. Fourth Youngest Child.
Present Value per \$100 Annual Wage Base Payable Until Age 18.

VIII. Fifth Youngest Child.
Present Value per \$100 Annual Wage Base Payable Until Age 18.
IX. Children at 66 2/3%
Present Value per \$100 Annual Wage Base Payable Until Age 18.

1st Child.
2nd Child.
3rd Child.
4th Child.
5th Child.
