## Foreword

The revised tables in this bulletin apply only to compensation cases where the accident occurred on or after January 1, 2001. The earlier tables in the 1983 *Special Bulletin 222B* apply to cases where the accident occurred prior to January 1, 2001.

Chapter 6 of the Laws of 2007 amended Workers' Compensation Law § 27 to change the discount rate applicable to new deposits into the Aggregate Trust Fund on claims made after July 1, 2007, involving accidents or deaths occurring on or after January 1, 2001. The rate changed from the 6% rate applicable to prior accident dates to an "industry standard rate" to be determined by a regulation promulgated by the Superintendent of Financial Services. Regulation No. 119 adopting 11 NYCRR § 151-2.2 set the industry standard rate at 5%.

These tables were approved by an actuarial advisory committee that included Reuben Epstein of the New York State Insurance Fund and Martin Heagen and Ziv Kimmel of the New York Compensation Insurance Rating Board. On behalf of the New York State Workers' Compensation Board, I wish to take this opportunity to express my appreciation to these individuals and their staffs for their efforts in preparing these tables.

**WORKERS' COMPENSATION EXAMPLES**

*Example No. 1*

*Death Case*

*Award to Widow or Widower and One Child*

To find the value as of 1-28-11 of an award to a widow or widower and one child with birth dates as given below where the injured employee had received annual wages of \$60,000, was killed 9-1-10, and compensation benefits had been paid regularly to the dependents to 1-28-11.

Dependents	Date of Birth	Nearest Age	Nearest Age

\* Increase to 1-28-11:  
From 9-1-10 to 1-28-11 is 149 days.  
Since the decrease from 9-1-10 to 9-1-11 is \$0.13, the decrease for 149/365 of a year is \$ 0.05.

\*\* Reduced to \$577.07 since the maximum weekly wage base from 7/1/2010- 6/30/2011 was \$1,109.75.

\*\*\* Subject to Social Security offset if applicable.

*WORKERS' COMPENSATION EXAMPLES*

*Example No. 3  
Schedule Disability Case*

A married employee lost his arm 11-15-09 and was given an award of \$600 per week for 312 weeks from that date. Compensation was regularly paid to 4-18-10, on which date an advance lump sum award of \$30,000 was made. What is the effect of this award by the following plans?

- (a) Payments can be suspended for how many weeks?
- (b) Weekly compensation rate can be reduced to what amount?
- (c) Payments will terminate on what date if this amount is deducted from the end of the award?

From Table XXIV it is found that 22 weeks have been paid to 4-18-10 so that on that date 290 weeks remain unpaid.

**Plan (a):** To determine the suspension period, we will convert the lump sum into a result which we will then compare to the present value of a \$1 weekly benefit rate from Table XIII through interpolation. In order to convert, take the lump sum and divide it by the weekly benefit rate and then interpolate the suspension time by using the closest present values to your result. In this case, take the \$30,000 lump sum and divide it by \$600 per week to get a result of \$50 at \$1 per week. From Table XIII, \$50 lies between the present value for 51 weeks and the present value for 52 weeks.

From Table XIII, the present value for 51 weeks .....	49.7797
From Table XIII, the present value for 52 weeks .....	<u>50.7323</u>
<i>Increase</i> for 1 week.....	<u>0.9526</u>
The present value for unknown number of weeks .....	50.0000
The present value for weeks .....	<u>49.7797</u>
	Difference <u>0.2203</u>

$$0.2203 / 0.9526 = 0.23$$

**Payments should therefore be suspended for 51.23 weeks from 4-18-10 (=51 weeks + .23 weeks).**

**Plan (b):** From Table XIII, the present value of the remaining 290 weeks is  $253.8869 \times \$600$  or \$152,332.14. Of this amount \$30,000 or 19.69% of the present value was reduced by the lump sum award. All future payments may therefore be reduced by  $0.1969 \times \$600$  or by \$118.16 so that **\$481.84 is the new weekly rate.**

**Plan (c):** As in Plan (b) the present value of the 290 weeks remaining is found to be \$152,332.14 Of this amount \$30,000 is now paid so that the remaining present value is \$122,332.14 at \$600 per week or \$203.8869 at \$1 per week. From Table XIII, \$203.8869 lies between the present value for 226 weeks and the present value for 227 weeks.

From Table XIII, the present value for 226 weeks .....	203.6216
From Table XIII, the present value for 227 weeks .....	<u>204.4304</u>
<i>Increase</i> for 1 week .....	<u>0.8088</u>
The present value for unknown number of weeks .....	203.8869
The present value for 226 weeks .....	<u>203.6216</u>
	Difference <u>0.2653</u>

$$0.2653 / 0.8088 = 0.33$$

**Payments will therefore terminate 226 weeks after 4-18-10 on 8-24-14 with a final additional payment of \$198.00 representing 0.33 weeks.**

*WORKERS' COMPENSATION EXAMPLES*

*Example No. 4*

*Permanent Partial Non-Schedule Disability Case*

To find the present value on 6-15-07 of a life award of \$400 per week made to an employee born 8-13-80 if payments had been made to 6-15-07.

From Table XI the tabular value at age 27 for each \$1 of annual compensation is 16.751. The annual compensation benefit is 52 X \$400 or \$20,800. **The present value of annual compensation benefits is therefore \$20,800 X 16.751 or \$348,420.80.**

(Note. - This method is sufficiently accurate for reserve purposes. If an exact value is needed such as for purposes of a lump sum settlement, an interpolation must be made between anniversary dates of the accident. A similar interpolation for a fatal case is illustrated in Example No. 1.)

*WORKERS' COMPENSATION EXAMPLES*

*Example No. 5*

*Interest Due on Award Affirmed on Appeal*

Calculate the amount of interest due on an award in the following situation: The WCB judge granted a claimant on 4-22-11 an award of 40 percent loss of use of arm (124.8 weeks beginning with the date of injury, 7-7-10) at \$739.83 per week. The insurance carrier, deciding to continue to controvert the case, appealed the 4-22-11 decision and opted not to pay anything. On 11-1-11 the court confirmed the 4-22-11 award and directed the insurance carrier to make payments from 7-7-10 to 11-1-11 plus interest.

The total amount of interest due in the above case is determined by two separate calculations: (1) Calculation of the amount of interest for the period 4-22-11 (date of award) to 11-1-11 (date of payment) on the amount of compensation benefits which were due and unpaid for the period 7-7-10 (date of injury) to 4-22-11 (date of award); and (2) Calculation of the amount of interest on compensation benefits payable in periodic installments during the period 4-22-11 (date of award) to 11-1-11 (date of payment).

- (1) From 7-7-10 to 4-22-11 = 41 <sup>2</sup>/<sub>7</sub> wks. = 41.2857 wks.  
 Multiplied by weekly compensation rate = X \$739.83  
 Product-Compensation Benefits due and unpaid  
     for period 7-7-10 to 4-22-11 = \$30,544.40  
 Interest on \$1 for 1 week at 5% per annum (.05/52) is .00096  
 The interest period 4-22-11 to 11-1-11 = 27 <sup>4</sup>/<sub>7</sub> wks. = 27.5714 wks.  
 We have \$30,544.40 X .00096 X 27.5714  
**= \$808.47 interest on accrued compensation for period 7-7-10 to 4-22-11.**

- (2) From 4-22-11 to 11-1-11 = 27.5714 wks. during which period compensation benefits are payable in periodic installments. The interest period on each installment decreases progressively. The interest period on the first weekly installment of compensation for the week 4-22-11 to 4-29-11, assuming that the installment is payable at the end of the first week, is 26.5714 wks. (or 1 week less than the total period from date of award to date of payment). Similarly, the interest period on the second installment of compensation benefits is 25.5714 weeks (or 2 weeks less than the total period from date of award to date of payment). The total amount of interest due on periodic installments in any case may therefore be computed by using the formula\*:

$$\text{Interest} = (\text{avg. interest period per payment}) \times (\# \text{ of payments}) \times (\text{weekly interest factor}) \times (\text{weekly indemnity rate})$$

$$\text{In this case Interest} = \frac{(26.5714 + .5714)}{2} \times 27 \times .00096 \times \$739.83$$

$$= \mathbf{\$260.25 \text{ interest on periodic installments from 4-22-11 to 11-1-11.}}$$

**Total amount on interest due to 11-1-11 is \$808.47 + \$260.25 = \$1,068.72**

\* You may also use a first principles approach by applying the following computation on weekly payments starting one week after the 4-22-11 award for all of the payments to 11-1-11:

$$\text{Interest} = \sum \left( (\text{weekly interest factor}) \times (\text{weekly indemnity rate}) \times (\text{duration}_{m \text{ weeks}}) \right)$$

This will also produce an answer of \$260.25 for the second interest component of this example.

**WORKERS' COMPENSATION EXAMPLES**

*Example No. 8  
Death Case  
Third Party Recovery*

*Award to Widow and No Children*

In a fatal case where the deceased's earnings were \$55,000 and death occurred 5-14-10, the carrier paid until 12-16-10 when there was a 3rd party recovery of \$750,000 by the widow who had no children. Find the value of the deposit into the Aggregate Trust Fund as of 8-14-11.

Dependents	Nearest Age 5-14-11	Nearest Age 5-14-12
Widow	44	45

	From Table	Value 5-14-11	Value 5-14-12	1 Yr. Decrease
Widow's Benefit	I	\$901.75	\$898.98	-\$2.77
Less: Decrease to 8-14-11 92/365 X (-2.77) =		-0.70		
Present Value 8-14-11 per \$100 Annual Wage		\$901.05		

The widow receives benefits at the rate of two thirds of \$46,800\* or \$31,200 per annum, therefore her \$750,000 recovery would suspend payments for 24.04 years or 1,250 weeks. Payments will then resume on November 30, 2034. The present value of this suspension is the present value for the payments suspended from 8-14-11 to 11-30-34, a total of 23.312329 years.

From Table XV for a widow aged 44 -	
Present value of an annuity for 23 years .....	= \$785.42
Present value of an annuity for 24 years .....	= 798.55
By interpolation for 23.312329 years .....	= 789.52
= 789.52	
<i>Summary</i>	
Present value per \$100 Annual Wage .....	901.05
Credit for recovery .....	<u>-789.52</u>

*Social Security Offset with a Widow and No Children*

Given a fatal case in which the employee was killed on 1/28/2011 who earned \$62,400 a year, leaving a widow with no children, and the widow's social security survivor's benefit is \$1,600 per month, compute the new present value of the widow's benefit as of 1/28/2012 after taking into account the Social Security Offset (referred to as Monthly (M), Annualized (A), and Weekly (W) SSO in this example).

Widow Information	Date of Birth	Nearest Age

Annualized Adjusted Weekly Wages =Adjusted Weekly Wages X 52		43,306.38
Multiply Widow's Benefit by Number of \$100 Annualized Adjusted Weekly Wages		(887.66) X (433.0638)
Present Value of Future Payments as of 1-28-12		<b>\$384,413.41</b>

\* Reduced to \$1,109.75 since the maximum weekly wage base from 7/1/2010-6/30/2011 was \$1,109.75.

\*\* Multiply the result by .50 because the weekly wages of the decedent was in excess of \$200 as per WCL § 16 Table No. 1 Social Security Offset for Widow and No Children.

*Refund of a Capped PPD Deposit from the ATF*

An employee who was earning \$75,000 a year was injured on 6/30/2010 and was receiving indemnity payments since that time. The Worker's Compensation Board on 6/29/2011 classified him as permanently partially disabled with a 85% loss of earning capacity, thereby awarding him 475 weeks at a benefit rate of \$600\* per week. A deposit was made into the Aggregate Trust Fund on 9/28/2011, or 13 weeks after the classification date. If a few years later the WCB makes a ruling issuing a refund because the ATF is no longer obligated to pay, such as if the employee died for reasons non-causally related to his injury and he had no beneficiaries to collect the remaining monies, calculate the refund to the carrier as of 1/6/2016 or 236 weeks from his classification date.

	From Table	Value as of 1/6/2016
