<<Date>>

Dear <<Injured Worker Name>>,

On June 5, 2019, the New York State Workers' Compensation Board implemented a Prescription Drug Formulary (Formulary). The Formulary is a list of medications that you, as an injured worker, are eligible to receive under your workers' compensation medical coverage.

As of June 5, 2020, all medication refills must follow the Formulary. Our records indicate that you currently have prescriptions for the following non-Formulary medication(s):

Date of Prescription	Medication Name	Prescribed by

Over the next several months, you should discuss these medications with your provider to determine if it is possible to prescribe a different medication that is on the Formulary. If your provider feels continuation of the current medication is necessary, they may request approval, known as a prior authorization, to continue your current medication after June 5, 2020. A prior authorization for each current medication that is to be continued must be approved before you will be able to receive an additional supply of that medication.

Please be advised that we are also notifying your provider of the need to review your medications with you. If you have any questions regarding these medications, you can call our customer service center at <<Payer Customer Service Phone Number>>.

Thank you,
