

Assessment of Public Comment

During the public comment period, the Board received one written comment.

The comment requested clarification about the email subject names or lines the prior authorization requests (PAR) will use. The Board has not made a change to the regulation in response to this comment because this regulation concerns the date for designating contacts (that was May 1, 2021), but has forwarded this inquiry about the actual process of prior authorization requests to the appropriate business unit at the Board for response.
