135	Edit Matrix - Population Restrictions	DN0187 (Claim Administrator FEIN)	Relaxing error 064 (Invalid data relationship) so that it does not occur on FROI-02 or SROI-02. This is being relaxed since an Insurer who is acting as their own Claim Administrator might need to fix an incorrectly sent FEIN by first sending an 02 transaction with fixed DN0006 (Insurer FEIN) and incorrect DN0187 (Claim Administrator FEIN) and then sending the second 02 transaction with fixed DN0006 (Insurer FEIN) and fixed DN0187 (Claim Administrator FEIN). Any transactions sent after the first 02 transaction is accepted but before the second 02 transaction is accepted will be rejected. So when transactions are sent by files, it is strongly recommended that both be sent in the same file right by each other ... and when transactions are entered in our web data entry application, that the second be entered immediately after the first.	1/10/2014	10/21/2013

If the Claim Administrator has no information concerning lost time or disability, it may wait and investigate before accepting or denying the claim. However, prompt investigation is needed as within 10 days of information from the employer that the claimant: (1) has lost time beyond the working day or shift (2) has returned to work; or (3) has medical treatment beyond ordinary first aid, the Claim Type Code must be updated. The update can be made on the FROI with an 02-Change or on the SROI showing "I" = Lost time/Indemnity or "M" = Medical. Under NYCRR §300.22(c) the Claim Administrator should not be waiting for indexing to file the initial acceptance or denial. However, the Claim Administrator retains the statutory right to controvert within 25 days of indexing. NOTE: The date the medical bill is paid is unrelated to the Claims Administrator's responsibility to file the FROI-02 or SROI. If a medical bill is disputed after acceptance of a claim, a Form C-8.1 should be filed to dispute the bill.	8/3/2015	8/3/2015

315	Edit Matrix - Population Restriction Table	DN0074 (Claim Type Code)	In accordance with IRR753, the following edit 064 will be modified for dates of accident on or after 11/1/18. A) If no DN0074 (Claim Type Code) has been accepted yet, then initial value must be I (Indemnity for Lost Time/Indemnity), M (Medical Only) or N (Notification of an Incident Only). This applies to dates of accident prior to 11/1/18. **Note: This edit is an existing edit that was modified to apply to only dates of accident prior to 11/1/18. Claim Type Code will continue to be used as an "acceptance" for those claims.**	11/6/2017	11/1/2018
316	Edit Matrix - Population Restriction Table	DN0074 (Claim Type Code)	New Population Restriction (Error 064) will be added stating: D) If no DN0074 (Claim Type Code) has been accepted yet, then initial value must be I (Indemnity for Lost Time/Indemnity), M (Medical Only), N (Notification of an Incident Only), W (Lost Time with no paid Indemnity), or P (Indemnity with No Lost Time Beyond Waiting Period). This applies to dates of accident on or after 11/1/18. **Note: In accordance with IRR753 the IAIABC Claims EDI R3.0 standard states that the Claim Type Code can no longer be used as an "acceptance" of a claim. The Claim Type Code is the current classification of a claim for dates of accident on or after 11/1/18. This edit is implemented to emphasize the proper use of the new Claim Type Codes. Please refer to the DN Reporting Requirements Specific to NYS document located at http://www.wcb.ny.gov/content/ebiz/eclaims/NYReqTables.jsp for details.**	11/6/2017	11/1/2018

317	Edit Matrix - Population Restriction Table	DN0075 (Agreement to Compensate Code)	New Population Restriction (Error 064) will be added stating: D) Agreement to Compensate Code must be L (With Liability) if Claim Type Code is M (Medical Only) or W (Lost Time with No Paid Indemnity) for all dates of accident ~~on or after 11/1/18~~. **Note: This edit is applied pursuant to Section 21a which states that it applies only to indemnity claims. By sending Agreement to Compensate Code as Without Liability a Claim Administrator is informing the Board that indemnity is being paid pursuant to Section 21a for up to one year from first benefit payment issue date or until ANCR/ODNCR is established, whichever occurs first. Since Claim Type Codes M and W are not indemnity type classification codes, Agreement to Compensate Code cannot be sent stating Without Liability since that would be notifying the Board that indemnity is being paid pursuant to Section 21a. Reminder: Since Agreement to Compensate must be With Liability on the FROI (see edit 0075-064 G listed in ID #326) this only applies to SROI.**	11/6/2017	11/1/2018
318	Edit Matrix - Population Restriction Table	DN0075 (Agreement to Compensate Code)	New Population Restriction (Error 064) will be added stating: E) Agreement to Compensate Code must be L (With Liability) if Claim Type Code is P (Indemnity with No Lost Time Beyond Waiting Period) if only BTC accepted to date is 030, 090, 530, or 590 and dates of accident on or after 11/1/18. **Note: If Claim Type Code is P and BTC accepted to date is 030, 090, 530, or 590 then this is a Schedule Loss of Use case with No Compensable Lost Time. Since this is not considered an indemnity case then Section 21a cannot apply; therefore, Agreement to Compensate Code must be sent as With Liability.**	11/6/2017	11/1/2018
319	Edit Matrix - Population Restriction Table	DN0075 (Agreement to Compensate Code)	New Population Restriction (Error 064) will be added stating: F) Value on FROI-00/AQ/AU must be null if Claim Type Code is N (Notification of Incident Only). This applies to all dates of accident ~~on or after 11/1/18.~~ **Note: If the claim is classified as a Notification of Incident Only claim (meaning that there is no lost time or no medical treatment beyond first aid) then Agreement to Compensate Code must be null since the case is not ready for acceptance.**	11/6/2017	11/1/2018

366	Edit Matrix - Population Restriction Table	DN0072 (Latest Return to Work Status Date)	Relaxed 0072-064 by removing DN0056 (Initial Date Disability Began) from A). Added B) Must be after DN0056 (Initial Date Disability Began) unless DN0189 (Return to Work Type Code) = R (Released) effective 1/31/19. **Note: This relaxed edit was requested by Claim Administrators as there was a business need for DN0072 and DN0056 to be equal and the DP Rule does not state they cannot be equal.**	2/15/2019	1/31/2019

Agreement to Compensate Code allowed as W (Without Liability) on a FROI-02 if accepted on a previous transaction. 380	Element Requirement Table - FROI Conditional Requirements	DN0029 (Policy Effective Date)	Relaxed conditional requirement to include Insured Type Code =I. The requirement now reads: MTC 04, UR: Required if Date Claim Administrator Had Knowledge of the Injury is on or after 1/1/08, unless Full Denial Reason code is No Coverage - No policy in effect on the date of accident, No Coverage - No Jurisdiction, or No Employer/Employee Relationship and Insured Type Code = I (Insured). Effective 7/19/2019 date is not required unless Insured Type Code = I. MTC 00, AU: Required if the Date Claim Administrator Had Knowledge of the Injury is on or after 1/1/08 and Insured Type Code = I (Insured). Effective 7/19/2019 date is not required unless Insured Type Code = I. **The business reason for this change is an issue that was raised by a Claim Administrator, we relaxed the edit because it is logical that the Claim Administrator would not have this information if the employer was self-insured or uninsured. Since we don't require the policy number, it made sense to not require the policy effective date.**	8/13/2019	7/19/2019
381	Element Requirement Table - SROI Conditional Requirements	DN0056 (Initial Date Disability Began)	Relaxed conditional requirement to include BTC 090 (Permanent Partial Disfigurement). There is no reason to require an Initial Date Disability Began in this scenario so the requirement has been relaxed.**	8/13/2019	8/2/2019
